Electronic Health Record (EHR) Resources for Age-Friendly Health Systems: Oracle

Age-Friendly Health System Model Experience Page

This webpage includes an overview of the standard Oracle Health (formerly Cerner) content published in the first quarter of the calendar year 2025, and updated on a quarterly basis.

The following packages contain the new What Matter's DTA based on venue of care:

660514 - **Oracle Health EHR: Adult Acute Care Content Package** (January 2025) or its replacement. See the Inpatient Admission PowerForm (Titled: Admission History Adult).

663027 - **Oracle Health EHR: Adult Ambulatory Care Content Package** (February 2025) or its replacement. See the Ambulatory Intake PowerForm (Titled: Adult Ambulatory Intake).

665161 - **Oracle Behavioral Health Content Package** (March 2025). See BH Outpatient Intake Assessment Adult and BH Adult Biopsychosocial PowerForms.

All build / configuration information for the **Age Friendly Worklist** and **MPage Component** can be found on the Age Friendly Health System page, under the Localization section. Continue to stay updated by following the What's New Guide for updated content information.

Access the Age Friendly Health System page here.

Access the What's New Guide here.

An active *Oracle Health Millenium* account is necessary to access these materials.

AFHS and Oracle Health

These resources are the culmination of a working group of Age-Friendly Health System Participants convened by IHI and Oracle Health.
